

# The MSE Difference

At MSE, we do more than assemble toner cartridges. We utilize our state-of-the-art engineering and innovation to manufacture products that print like the originals. Providing quality products, quality service and value are our top priorities. Experience the difference.

## PATENTED TECHNOLOGIES

Secondary Cleaning System

Minimizes streaking and banding. Improves overall print quality \*

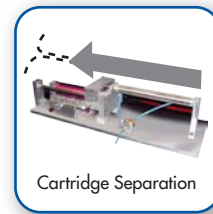

Ultrasonic Welding Technology

Eliminates leaking. Maintains original cartridge critical gap alignment \*

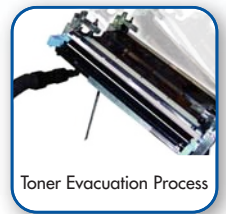

Laser Cutting Technology

Computer-guided cutting for consistency. Reduces cutting waste by 99%\*

Cartridge Separation

Does not remove plastic or cut through realignment pins. No clips needed \*

Toner Evacuation Process

Product arrives clean with OEM appearance. Eliminates leaking \*

\* For more information on MSE patented technologies, please contact MSE representative

## AWARD-WINNING QUALITY

- Industries most stringent testing protocols including environmental stress, accelerated aging, and ISO 19752/19798 yield tests
- Industries most stringent 5 step QC protocol including triple QC testing and exhaustive destructive testing
- Voted industry's Best In Quality for 6 consecutive years

## MARKET SUPPORT

MSE offers market leading value added support. Consultative sales approach includes:

- Market intelligence
- Dealer training
- Facility tours
- Marketing support
- Private labeling and packaging programs
- MPS expertise and partnership
