

Not all cartridges are created equal

**Compatible with:
HP 9000/9040/9050 Series**

Complete with Smart Print Chip

Patented technology

- Computer-guided cutting = consistency
- Reduces cutting waste by 99%
- Increases manufacturing efficiencies
- Ensures proper cartridge alignment
- Guaranteed performance

MSE's methods are far from standard.

MSE's Patented Laser Cutting Technology is computer-guided, eliminates human error, and enhances the aesthetic appearance of MSE's finished product. Splitting time for the HP 9000 takes MSE less than 4 minutes and reduces the cut width to less than 1/100th of an inch. This process allows MSE to successfully manufacture future models that utilize chemically bonded seams. Available for outsourcing - contact us today for more information.
